

JONBESH AHMADZAI

Junior AI & Data Engineer | Python · SQL · ETL/ELT · Machine Learning · BI
Brussels, Belgium • jonbesh.ahmadzai@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE

I'm a Junior AI & Data Engineer who builds data systems end to end. I work in Python, SQL, Azure, FastAPI, Docker, and Power BI across ML pipelines, ETL/ELT workflows, and business intelligence dashboards. My business management background means I care about both the code I write and the problems it solves. I've delivered BeCode partnership use cases for banking and consulting institutions, alongside personal data projects I build on my own. Multilingual across 6 languages, permanent EU resident.

SKILLS

Programming & Databases

Python · SQL · PostgreSQL · NoSQL · Object-Oriented Programming · DBaver CE

Machine Learning & AI

Scikit-learn · Random Forest · XGBoost · CatBoost · Supervised Learning · Classification · Regression · Feature Engineering · Model Evaluation · Predictive Modelling · AI-Powered Automation

Data Engineering, Cloud & DevOps

FastAPI · Docker · REST APIs · ETL/ELT Pipelines · Web Scraping · Azure · Git · Agile/Scrum

Data Analysis, Statistics & BI

Pandas · NumPy · Excel · SPSS · Exploratory Data Analysis · Statistical Analysis · Power BI · DAX · Power Query · Data Modelling · Star Schema · Streamlit · GeoPandas

Business & Consulting

Stakeholder Communication · Requirements Gathering · Strategic Recommendations · Process Analysis · Market Research

Currently Learning

AWS · Apache Airflow · Apache Spark · dbt · Databricks · Kubernetes · CI/CD

FEATURED PROJECTS

[Belgian Real Estate — End-to-End ML Pipeline](#)

Python · SQL · Pandas · Scikit-learn · XGBoost · CatBoost · FastAPI · Docker

- Built an ML pipeline for the Belgian housing market: collected and cleaned 23,000+ property listings, engineered features, and compared multiple regression models
- Selected CatBoost as the production model and deployed it as a containerised API on Render

[DragonYTE Brewery — Power BI Business Intelligence](#) BeCode × Accenture Belgium

Power BI · DAX · Power Query · Star Schema · Data Modelling

- Use case via BeCode × Accenture Belgium partnership: designed a star-schema data model and built 15+ KPIs in DAX covering revenue growth, market share, pricing trends, and competitive positioning
- Delivered a 4-page interactive executive dashboard covering market performance, competitive positioning, and channel strategy; presented in a final review with Accenture Belgium professionals

[Satellite Crop Classification Pipeline](#)

Python · Sentinel-2 · Copernicus STAC API · Azure Blob Storage · GeoPandas · Scikit-learn

- Built a satellite-to-map pipeline: ingested Sentinel-2 imagery via the Copernicus STAC API, processed it through Azure cloud storage, engineered spectral features, and classified crop types using Random Forest
- Designed for reproducibility with modular, credential-safe configuration so the pipeline can be rerun and extended as new data arrives

[Market Watch Agent — Automated Intelligence Pipeline](#) BeCode Partnership

Python · LLM APIs · Azure Blob Storage · Web Scraping · JSON Diffing

- Use case for a major banking institution via a BeCode partnership: built an automated intelligence pipeline that monitored 5+ competitor sources and used LLMs to classify product changes, with state managed in Azure
- Replaced manual monitoring with a reproducible, automated workflow using structured JSON diffing to track and surface genuine changes

EXPERIENCE

AI & Data Science Trainee

Feb 2026 - Present

BeCode · Brussels

- Intensive AI & Data Engineering bootcamp combining structured learning with hands-on project work; built ML pipelines, statistical models, geospatial classifiers, dashboards, and automated data systems across real datasets
- Completed partnership use cases including a Power BI dashboard via BeCode × Accenture Belgium, presented to senior professionals; consistently translated complex analytical outputs into clear conclusions for non-technical audiences

Career Transition into Data & AI

Jun 2025 - Jan 2026

Self-Directed Study · Brussels

- Self-directed study in Python, SQL, data analysis, and BI fundamentals alongside a period of personal recovery; built foundational technical skills and gained admission to BeCode's intensive AI & Data bootcamp

Marketing & Sales Associate

Jul 2024 - May 2025

GOGI · Brussels

- Designed and maintained KPI dashboards in Excel and Power BI tracking sales performance, customer acquisition, and channel ROI; conducted customer segmentation and behaviour analyses that informed pricing, campaign, and channel decisions across the team

Digital Marketing & Sales Intern

Feb 2023 - May 2023

IKI · Brussels

- Built campaign performance reports in Excel comparing channel ROI; conducted competitor analysis on local market positioning, pricing, and digital presence; presented findings to founders to support marketing strategy decisions

EDUCATION

AI & Data Science Bootcamp

BeCode Brussels · Feb 2026 - Present

Bachelor of Business Administration

KU Leuven Brussels · 2018 - 2020 · Transferred to Odisee

BSc Business Management

Odisee University, Brussels · 2020 - 2024

International Baccalaureate Diploma

Eastern Mediterranean International School, Tel Aviv · 2014 - 2016

ADDITIONAL INFORMATION

Certifications

SQL · Google Analytics · Excel Data Analysis
In Progress: AWS Cloud Practitioner · Fabric Data Engineer Associate

Languages

English (C2) · Persian (C2) · Turkish (C1) · Urdu (C1)
Working knowledge: French (A2, actively improving) · Spanish (A2)
